See your patients’ complete picture of health with this enterprise-wide clinical multimedia solution.

As part of the Sovera HIM enterprise solution, Sovera EPMM offers a complete web-based digital records management system, resulting in improved customer service, enterprise-wide accessibility, and increased staff productivity.

**IMPROVES PATIENT CARE AND OUTCOMES**

- Combines patient media from multiple sources to create a unified 360° view of the patient
- Delivers the complete picture of the patient to the entire medical team in a simple, secure interface.

**ENSURES SECURITY AND PRIVACY**

- Ties patient multimedia to health records
- Includes secure access to distributed clinical multimedia and data from sources including mobile devices
- Centrally manages information from all existing department level systems and formats.

**ENHANCES OPERATIONAL EFFICIENCY**

- Open system optimizes existing resources throughout the enterprise
- Shares images and multimedia between departments
- Links legacy systems and transforms previously inaccessible files into useful data
- Easy to manage and access with total security.

**BUILT AROUND HOW PROVIDERS SEE THE PATIENT**

- Brings together all clinical media including images
- Every authorized provider sees the complete patient record
- Incorporates output from legacy systems throughout the enterprise
- Enables HIPAA compliance by securely managing information.

KEY FUNCTIONS

- Image capture and management spanning 40+ specialty departments
- Seamless content integration across specialty, ECM and EHR solutions
- Secure, real-time collaboration between care team members
- Certified with smartphones and tablets

“Enabling our clinicians to consult across specialties to improve patient care is imperative. EPMM enables HFHS to manage clinical images and related data across specialties without impacting the way the clinicians work. The result is a better integrated clinical team while reducing risk, to improve patient outcomes at a lower cost.”

J. Mark Tuthill, M.D., Division Head of Pathology Informatics, Henry Ford Health System

**C-Level Executives**
Reduces risk by increasing security, minimizing medical errors and adding cost efficiencies.

**Operations**
Supports seamless day-to-day clinical operations with minimal maintenance and maximum efficiency.

**Departments**
Apollo EPMM works the way each specialist works by building on familiar systems already in place while enabling cross-department collaboration. The net impact is improved patient outcomes.

**Users**
Apollo EPMM is flexible enough to meet the clinical image and data management requirements of all users in the enterprise.
